VibLongPeak

PC based visualisation/analysis of long term data

The programm VibLongPeak generates a graphic from multiple measurements over days or weeks. For that there are automatically the suitable files out of various VIBRAS-data selected.

The representation of the graphics can be adjusted in various ways

Main Features:

- Represents the results of a series of measurements as a graphic
- The graphics are available as high-resolution metafiles (EMF)
- Day/Night Levels
- KB FTm Calculation
- Leq Calculation
- Export of calculated data as text file
